

ACCESS

[TX3] Series

ACCESS CONTROL

TX3 Single Door Controller

Simplifying Access Control

The latest addition to the TX3 family of access control units, the TX3-CX-1 has all the features for an entry level access control application with the flexibility for scalability. An innovative PoE controller with a built-in proximity reader that can be used stand alone or networked using either RS-485 or TCP/IP.

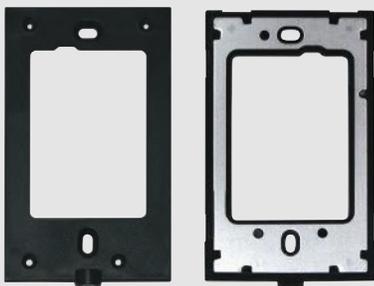

- **Simple** – Simply mount onto a single gang electrical box and connect CAT-5/6 cable for both power and network communication.
- **Flexible** – Power the TX3-CX-1 by either 12 VDC, 24 to 48 VDC or PoE. Network the controller by RS-485 or TCP/IP.
- **Versatile** – The controller has a built-in 125 KHz proximity reader for interior applications. Any second Wiegand card reader can be added for outside of the door.
- **Scalable** – The TX3-CX-1 may be used stand alone or networked to other TX3 platform devices for up to 63 nodes, if using the RS-485 network. Essentially no limit if TCP/IP is used.

Features

- 7500 Users
- Programming – local via USB or remotely via TCP/IP
- Supports two card readers; one built-in and one external optional Wiegand reader
- Tamper detection for controller and communication cable cut
- Two Form C programmable relays; 24V AC/DC, 2 amp
- Four supervised inputs; Battery Back-up trouble, Request to exit, Door position switch, general purpose
- Temperature Range: 0° to 40° C (32° to 104° F)
- Visual LED diagnostics: Trouble, Alarm, Access granted, Access denied
- Support most common Wiegand card formats such as 26-bit, 32, 35, 37 and 50 bit and more
- 12 V/500mA max. solid state output for DC door strikes
- Metal reinforced mounting bracket to ensure proper alignment when fastening the secure screw

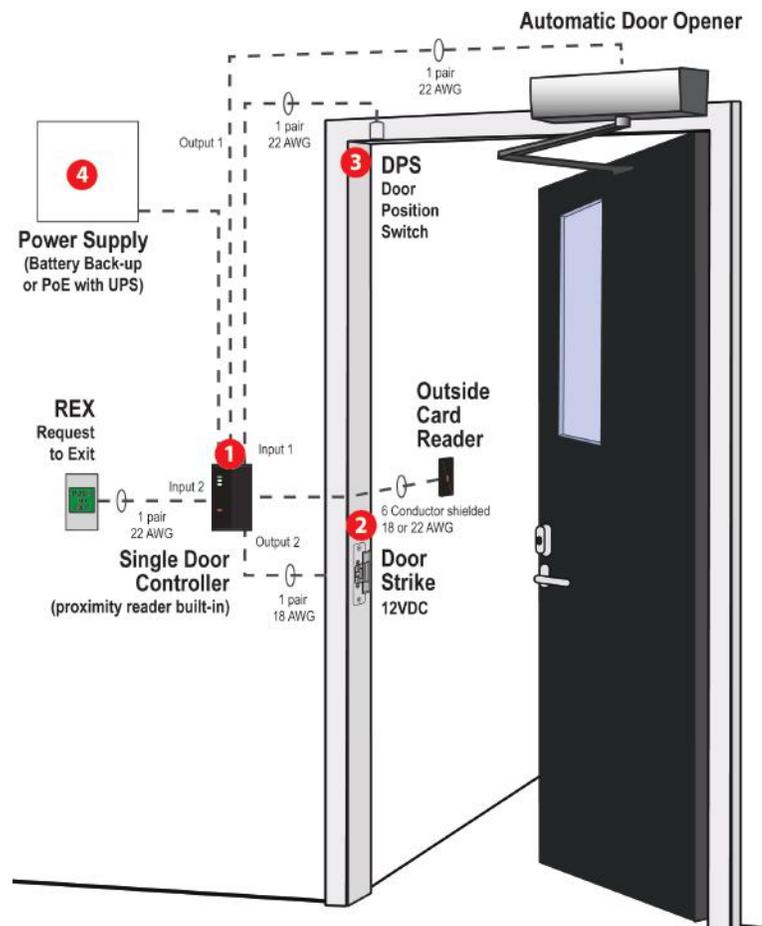

Mounting Bracket

Front

Back

Typical Network Diagram

- 1 TX3-CX-1 Single Door Controller fits onto single gang electrical box
- 2 Electric Door Strike preferably with a built-in door position switch
- 3 Door position switch
- 4 Power Supply with or without battery backup
